MD FUAD HOSSAIN SAAD

+8801943-033803 | contactwithfuad@gmail.com | Mirpur 2, Dhaka 1216

FuadSaad | Md. Fuad Hossain Saad | Protfolio

Motivated Computer Science and Engineering graduate with a strong interest in research, data analytics, machine learning, and academic writing. Experienced in published research involving Machine Learning, Association Rule Mining, Deep Learning, and predictive analytics. Skilled in Python, data analysis, research methodologies, technical documentation, and academic project development. A responsible and detail-oriented individual with strong communication, teamwork, and leadership abilities.

EDUCATION

B.Sc. in **Computer Science & Engineering** — Sep 2022 - July 2026
Daffodil International University — CGPA- 3.51/4.00
Daffodil Smart City, Birulia, Savar, Dhaka-1216

Higher Secondary Certificate — 2021
Gazipur Cantonment College — GPA- 5.00/5.00
BOF, Gazipur Cantonment, Shimultali, Gazipur-1703

TECHNICAL SKILLS

Programming & Data Analysis: Python | C | Java
Machine Learning & Research: Machine Learning | Deep Learning | Data Analysis | Predictive Analytics | Association Rule Mining | Explainable AI
Database: MySQL | Supabase
Web Technologies: HTML5 | CSS3
Tools: Git | GitHub | MS Word | MS Excel | PowerPoint
Additional Skills: Academic Writing | Research Documentation | Technical Writing | Presentation | Communication

PROJECTS

HealthScope BD — AI-Powered Epidemic Tracker & Health Companion — Github / Application
Technologies: Flutter, Dart, Firebase, Cloud Firestore, OpenStreetMap

- Developed a mobile health application using **Flutter and Dart** with AI-based symptom prediction and epidemic tracking.
- Implemented **Firebase Authentication, Cloud Firestore, disease reporting, real-time statistics, and epidemic heatmap** features.
- Built healthcare utilities including **nearby hospital search, emergency contacts, health insights, and dark/light mode UI.**

EzyHouse — Property Finding & Listing Application — Github / Application
Technologies: Flutter, Dart, Firebase, Provider

- Developed a Flutter-based property platform for **homes, offices, P.G. accommodations, and shops** with smart search and filtering.
- Implemented **Firebase Authentication, Firestore, Storage, in-app messaging, and interactive maps** for property management and communication.
- Built a responsive **Glassmorphism UI/UX** with smooth animations, lateral navigation, and integrated relocation/transport services.

HealthScope — Web-Based Health & Symptom Checker — Github / Website
Technologies: HTML, CSS, JavaScript, PHP, MySQL, XAMPP

- Developed a **web-based health platform** featuring symptom checking, user authentication, profile management, and health reporting.
- Implemented **PHP-based backend APIs and database integration** for managing user data, reports, and application functionality.

DIU Bus E-Ticketing System

- Designed and developed the System with user-friendly UI/UX
- Built an IoT-based GPS tracking device for real-time bus location monitoring
- Integrated ticketing and tracking system for efficient and smart campus transportation

PUBLICATIONS & RESEARCH

Identifying Factors Behind Late Assignment Submission using ML & ARM
Published Conference Paper- QPAIN2026

- Analyzed student behavioral patterns using Association Rule Mining (Apriori Algorithm).
- Applied Machine Learning models including XGBoost and SVM for predictive analysis.
- Developed a predictive approach achieving approximately 96% accuracy in identifying late assignment submission patterns.

Predictive–Prescriptive Analytics for E-commerce Profit Optimization
Published Conference Paper- ICBISD

- Developed predictive models using ANN, Random Forest, and XGBoost.
- Applied data-driven optimization techniques for improving e-commerce profitability.
- Analyzed discount and shipping-related decisions using predictive and prescriptive analytics.

ONGOING RESEARCH

NeuroGAT: 3D CNN-Transformer Hybrid GNN for Alzheimer's Classification

- Working on a multimodal deep learning framework for Alzheimer's disease classification.
- Integrating 3D DenseNet, PyRadiomics, Clinical Data, and Graph Attention Networks (GAT).
- Using Explainable AI techniques including Grad-CAM, SHAP, and LIME for model interpretability.

EXTRACURRICULAR & LEADERSHIP EXPERIENCE

Vice President, DIURC (Mar 2025 – Mar 2026)

- Assisted in leading club activities, coordinating events, and managing team members.

Campus Ambassador, BUET Robotics Society (May 2025 – Dec 2025)

- Promoted robotics-related programs and engaged students in technical activities.

Campus Ambassador, ICT Olympiad Bangladesh (Oct 2024 – Oct 2025)

- Promoted ICT and technology initiatives and encouraged student participation.

Campus Ambassador, Techfest IIT Bombay (Oct 2024 – Oct 2025)

- Represented Techfest initiatives and promoted student engagement in technology events.

Teacher & Campus Ambassador, Q-bit Learning (Jun 2024 – Jun 2026)

- Conducted educational activities while promoting learning programs among students.
